

# Cadaver Course - Facial Master Class, get a completely thorough knowledge, from tissue to bone!

June 13 – 14, 2024  
Cremona, Italy

 **ZimVie**  
Institute

Hands-On Workshop

# Invitation to a Human Cadaver Course

This advanced course aims to provide the real feel of a clinical setting through the use of cryopreserved human specimens. The soft and hard tissue of the specimen reacts as it would in a live patient's mouth to provide a more realistic experience. Unlike what you may have experienced in other courses, where the bone is of styrofoam quality.

**We look forward to your participation!**

## Speakers

### **Dr. Martijn Kerver\***

Martijn Kerver graduated in 2011 from ACTA. In 2014 he got to know Peter van der Schoor and he studied implantology by following many courses in the Netherlands and abroad. He is a registered implantologist since 2016 and he is full time active in oral implantology: He provides implantology in various practices of Dental Clinics and has taken over the implantology practice Garderen from Peter van der Schoor in 2021. With great enthusiasm he provides education in the field of implantology.

### **Dr. Jos Deurloo\***

Jos Deurloo is a general practitioner and dental implant specialist. He graduated cum laude at ACTA in 2000 and started placing implants in 2003. He owns a private dental clinic in Noord Scharwoude and has experience in the field of implantology in the Netherlands and abroad since 2005. He trains dentists in placing dental implants and performing GBR techniques in their own dental offices.

*\*This clinician has, or within the past two years, been bound by a financial relationship with ZimVie Dental for conferences, advice and other services.*

# Program

This is an amazing opportunity for implantologists at an advanced level!  
The personalized guidance provided by the instructors allows participants to explore both simple and complex cases, tailored to their individual needs.

## Topics covered during the course

1. Lateral sinus approach
2. Augmentation techniques with OsseoGuard® membranes
3. Immediate placement protocols: dual zone technique, surgical veneer technique and Socket shield technique
4. Soft tissue harvesting and reconstruction
5. Flap design and suturing techniques
